ORIGINAL and FENTO MAX.

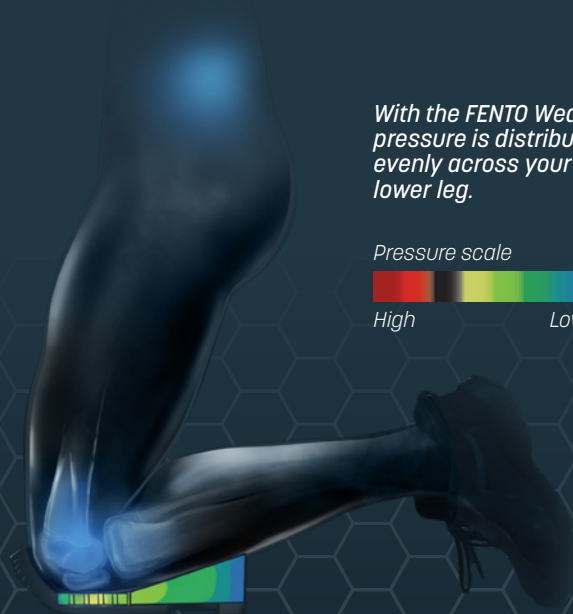

ERGONOMIC IMPROVEMENT

Prevent knee- and back problems with FENTO's unique ergonomic pressure distribution technology. With most knee protectors, the pressure is concentrated on the kneecap, leading to knee problems.

FENTO's innovative and award-winning concept evenly distributes the pressure across the lower leg, using an ergonomic wedge in all of the FENTO products. This is a major ergonomic improvement, preventing knee and back problems.

Why do FENTO knee pads also help prevent back problems? A stable sitting position is key in order to keep your back safe. Therefore, FENTO's products are designed to provide stability. The wide and flat surface provides a firm kneeling position. FENTO's ergonomic knee protectors aren't just for those already experiencing knee or back problems. Physiotherapists emphasize that prevention is better than cure. Investing in premium protection today, can help avoiding discomfort and health problems in the future. Choose FENTO and experience the difference!

*With the FENTO Wedge,
pressure is distributed
evenly across your
lower leg.*
