

IMPACT RESISTANT SAFETY SOLUTIONS

— HAND PROTECTION GEAR THAT MAKE AN IMPACT ON JOBSITE SAFETY

*SPONSORED ADVERTISEMENT

BDG[®] IMPACT RESISTANT WORK GLOVES ARE DESIGNED TO PROTECT YOU FROM IMPACT AND CRUSH INJURIES ACROSS A NUMBER OF INDUSTRIES AND WORK SETTINGS.

“Crushing it at work” should always mean that you’re getting the job done and done right, and not a trip to the ER. That’s why protecting your hands from impacts is vital on the jobsite, especially when working with tools, machinery, or heavy equipment.

Impact dangers exist on most every worksite. External hazards from drops, impacts, or blunt force can crush or injure knuckles and fingers. Heavy equipment and machinery can crush fingers and hands, and pinch points can cause fractures, dislocations and even amputations. BDG[®] offers a number of safety solutions that follow ANSI/ISEA 138-2019 standards to protect workers from these hazards.

THE STANDARDS ARE HIGH

Safety is always the number one priority on every jobsite. Studies show that some 70% of workers don’t wear any hand protection. And, of the ones that do, roughly one-third aren’t wearing the right glove for the work they’re doing.

Wearing the proper safety gloves designed for the task at hand is key to preventing workplace injuries. Always check if the gloves you plan to use meet the correct standard for impact resistance as established by ANSI/ISEA (American National Standards Institute/International Safety Equipment Association). ANSI/ISEA 138-2019 establishes performance levels, testing, and classification for gloves designed to protect the fingers and knuckles from impacts while performing occupational tasks.

IMPACT YOUR SAFETY BY REDUCING YOUR RISKS

- Always wear the proper safety gear on the jobsite. This is not an option.
- Choose gloves that offer the appropriate level of protection for the task you're doing and the hazards involved.
- Gloves that feature Thermoplastic Rubber (TPR) impact protection can protect your fingers and hands and reduce impact injuries by absorbing shock.
- Gloves with padded palms protect against injuries caused by the repetitive use of vibrating tools.
- Be aware of where your hands are at all times. Gloves with Hi-Viz accents help you, and those around you, be better aware of where your hands are, especially in low-light conditions.

IMPACT RESISTANT SAFETY SOLUTIONS FROM BDG®

Our gloves work as hard as you do. BDG® impact resistant gloves are engineered for safety and dexterity in high-risk environments. We craft them using advanced materials to protect you against impact injuries, deliver a comfortable fit, and provide you with a secure grip for precise handling.
